Aerospace  
Defense  
Chemical & Energy  
Medical & Life Sciences  
Industrial Equipment  
Transportation & Automotive  
Consumer Products  
Oil & Gas

“What I love about Belcan is the workplace community I found that has led to friendships outside the office. The flex time gave the opportunity to complete my Master's degree while working full-time. It is a very welcoming environment and management truly cares about the professional growth of their employees.”

– **Heather Bentley, 6 years**

“Here, leadership is not about positions or flowcharts—it's about a partnership between people where one life influences another in the world of engineering. It was also great to partner with my daughter during her Belcan internship!”

– **Mario Nadal, 2 years**

“The best part about working at Belcan is the flex schedule because I can spend more time with my family. I have also made some great friends here who I can't imagine not having in my life.”

– **Melanie Kafka, 5 years**
